

The Magic Questions

To achieve **success** ask yourself or your clients these questions – they are NOT sequential:

What am I trying to achieve?

What do you want?

What have I done to achieve this?

What are you currently doing to achieve this outcome?

Will my current strategies get me what I want?

Is it working? Is it effective?

What other way can I get what I want?

What other possibilities or ideas do you have to move closer toward the outcome you want?

Plan: what, how, when and where will I start my new behaviours

(Most effective if started within 24 hours)

Based on the work of Dr William Glasser
